Gothic Architecture. By the end of the twelfth century, as the Romanesque style was reaching its height, changes in church construction inaugurated a new style, later disparagingly called "Gothic" during the Renaissance, when it was called barbaric in comparison to the Roman models that influenced the architecture of that period.

**The Technology of Construction | Encyclopedia.com**  
Architectural technology, or building technology, is the application of technology to the design of buildings. It is a component of architecture and building engineering and is sometimes viewed as a distinct discipline or sub-category. New materials and technologies generated new design challenges and construction methods throughout the evolution of building, especially since the advent of industrialisation in the 19th century. Architectural technology is related to the different elements of a b

**Architectural technology - Wikipedia**  
Architecture, the art and technique of designing and building, as distinguished from the skills associated with construction. The practice of architecture is employed to fulfill both practical and expressive requirements, and thus it serves both utilitarian and aesthetic ends. Although these two ends may be distinguished, they cannot be separated, and the relative weight given to each can vary widely.

**architecture | Definition, Techniques, & Theory | Britannica**  
History of technology, the development over time of systematic techniques for making and doing things. The term technology, a combination of the Greek techné, "art, craft," with logos, "word, speech," meant in Greece a discourse on the arts, both fine and applied.

Roman architecture continued the legacy left by the earlier architects of the Greek world, and the Roman respect for this tradition and their particular reverence for the established architectural orders, especially the Corinthian, is evident in many of their large public buildings. However, the Romans were also great innovators and they quickly adopted new construction techniques, used new ...

**Roman Architecture - Ancient History Encyclopedia**  
The Battle of the Styles. Whilst the architect, mainly employed by cultured clients with Classical tastes, had no doubt that 'Classical' was the right form of architecture, the architects of the 19th century had no such certainty - nor the clients with the same formed tastes.
