The units of the longitude axis in the EPIC system library routine call should be selected either from the Unidata netCDF's udunits.dat file, or the EPIC system key file (see the EPS manual). The default spatial axis data type is real number. The recommended units are degree\_west (epic variable code 501).

## **EPIC - Documentation - EPIC netCDF General Conventions**

Also be sure to enter the usable storage space for a given media type, not the total storage space. For example, a 960GB SSD often has no more than 895GB of usable space once formatted. Note that actual available settings will depend on camera model and firmware version. Current values are intended as a rough guideline (some results may vary).
