Transformational Grammar Exercise Answer

Grammar refers to the set of rules that structure a language, including syntax (the arrangement of words to form phrases and sentences) and morphology (the study of words and how they are formed). Generative grammar is a theory of grammar that holds that human language is shaped by a set of basic principles that are part of the human brain (and even present in the brains of small children).

The Syntax Workbook: A Companion to Carnie's Syntax: A ...

Generative grammar is a linguistic theory that regards grammar as a system of rules that generates exactly those combinations of words that form grammatical sentences in a given language. Noam Chomsky first used the term in relation to the theoretical linguistics of grammar that he developed in the late 1950s. Linguists who follow the generative approach have been called generativists.

Generative grammar - Wikipedia

A generative grammar, in the sense in which Noam Chomsky used the term, is a rule system formalized with mathematical precision that generates,… The most widely discussed theory of transformational grammar was proposed by U.S. linguist Noam Chomsky in 1957. His work contradicted earlier tenets of ...
