A third book -- a textbook of human anatomy -- is strongly suggested, but not absolutely required. (1) DISSECTOR: Grant's Anatomy Lab, 15th edition. Wolters Kluwer. Based on the classic Grant's Dissector, this is an online dissection guide that has been customized specifically for this course.

### Course Website: HBA 461/561/540—Regional Human Anatomy ...

Regional anatomy is the study of the interrelationships of all of the structures in a specific body region, such as the abdomen. Studying regional anatomy helps us appreciate the interrelationships of body structures, such as how muscles, nerves, blood vessels, and other structures work together to serve a particular body region.

### Overview of Anatomy and Physiology | Anatomy and Physiology I

The Axial Region makes up the main axis of the human body and includes the head, neck, chest, and trunk. The Appendicular Region makes up the parts of the human body that connect to the axial region. This includes the limbs and appendages. These are the two basic categories of regional terms; however,...
