TANK FORCE ALLIED ARMOR - BALLANTINE'S WEAPONS BOOK 15 ...

Armored warfare was a salient feature of the Second World War; among WW2 tanks the Allied and German armies all employed tanks and other armored vehicles. Apart from battle tanks (which the British called "cruisers") there were infantry support tanks, reconnaissance vehicles and armored cars....

WW2 Tanks: American, British, and German - History

The US Army's World War II Tank-Destroyers: Waste of Time or Wonder Weapon? ... The tank-destroyer force was the Army's response to the wild successes of German armor in Poland and France in ...

The US Army's World War II Tank-Destroyers: Waste of Time ...

Although the Japanese Army widely employed tanks within the Pacific theater of war, the tanks that Allied forces in the Pacific faced were mostly older designs, such as the Type 95 Ha-Go light tank and Type 97 Chi-Ha medium tank.

Tanks in World War II - Wikipedia

World War 2 went on to set the new standard in combat tank design, resulting in the Main Battle Tank seen at war's end in 1945. Victory in the ground war of World War 2 could be decided through various means but it was the tank that ultimately took center stage.

World War 2 Tanks (1939-1945) - Military Factory

Tunisian muddy winter combined with a stiffened and well-ordered fighting retreat by hardened Axis troops was not what the Allies expected, and the arrival of general Kesselring with fresh reinforcements, including the brand-new Tiger tank, further increased the Allied disarray. As a response, British armor received new anti-tank guns, but to ...

WW2 British tanks and armored cars

Realizing their tank force was largely inadequate in dealing with Allied armor across the Pacific Campaign, the Imperial Japanese Army (IJA) enacted a new program to produce an increasingly capable design to counter the 30-ton American M4 Sherman appearing in ever greater numbers.

Type 3 Chi-Nu Medium Tank - Military Factory

American tanks in World War II were generally inferior to their German counterparts. German tanks boasted better armor protection and more firepower. But armor and lethality don't tell the whole story. The same American tanks were superior to their rivals in other important ways.

The U.S. Army's World War II Sherman Tank: Best Worst Tank ...

As units of the Japanese Army began to encounter advanced Allied medium tanks, such as the M4 Sherman, it was seen that the Japanese Type 97 Chi-Ha main battle tank lacked sufficient armor or armament to deal with this threat, and work was begun on a tank destroyer version.

Tanks in the Japanese Army - Wikipedia

With 80 m of front armor, a gun able to knock out rivaling medium tanks up to 1 km away, and with a proven combat record, the Panzer IV remained the standard German medium tank, making up most of the tank composition in the 1943-1944 battles.

What was the best German tank in WW2, in terms of ...

There is no organic air arm attached to the Army, but the air force is capable of doing a serious anti-tank job. In 1967, Mirage-III interceptors were used as ad hoc fighter-bombers, claiming no less than the destruction of 560 enemy planes, mostly on the ground, but also countless tanks & armored vehicles, using napalm.

Israeli Tanks - Tank Encyclopedia

Germany. The German tank force was an amazing success due to tactical innovation more than tank quality. Many of their tanks outclassed allied armor, delivered more casualties than they took in most engagements due to the impressive training the German soldiers received, and the excellent tactics used by the German forces. Using the Blitzkrieg....

Germany - World War Tanks

Tanks continued to use their firepower and armor protection to get close to and destroy enemy bunkers, caves, and dug-in positions as the terrain would allow. Flamethrower tanks again were very effective in these types of engagements. The coordination between the two combat arms (infantry and tanks) became highly acute during the campaign.

Armor in the Pacific theater of World War II Part II ...

When the M4 tank went into combat in North Africa with the British Army at El Alamein in late 1942, it increased the advantage of Allied armor over Axis armor and was superior to the lighter German and Italian tank designs. For this reason, the US Army believed that the M4 would be adequate to win the war, and relatively little pressure was initially exerted for further tank development.
